

Success Story

A Fortune 500 Japan-based Company

Printer Controller Interface for Wireless LAN

The Challenge

Design firmware for a printer controller used for wireless network printing. The support should also be given to make a generic printer controller for multiple printers

The Solution

Network Programs designed and developed a firmware based solution for wireless network printers. This solution is compatible with wireless LAN standards such as 802.11b and 802.11g.

Benefits

- ◆ One solution for similar range of printer controllers
- ◆ Added without affecting other components of firmware
- ◆ Supports multiple wireless LAN standards viz 802.11b and 802.11g
- ◆ Processor and OS independent

India Japan USA Australia

◆ Telecom ◆ Datacom ◆ Embedded

Onsite ◆ Offshore
